## PROJECTS

### ShoeMarkNet [🔗](#) | MERN Stack + DevOps January 2024 – Present

- Built a full-stack e-commerce platform for shoe reselling using the **MERN stack** with clean modular architecture (controllers, routes, services, models).
- Designed and implemented a **CI/CD pipeline using Jenkins** to automate build, test, and deployment workflows.
- Containerized the frontend (React) and backend (Node.js) with **Docker** to ensure consistent development and production environments.
- Used **Docker Compose** to orchestrate multi-service setup including frontend, backend, and **MongoDB**.
- Handled environment variables, build testing, and deployment verification to streamline development cycles.

### MyBlog [🔗](#) | MEAN Stack April 2023 – Present

- Developed a responsive blogging platform using the **MEAN stack**, enabling users to create, update, and manage posts.
- Implemented secure **JWT-based authentication and authorization** to protect user sessions and data.
- Built RESTful **APIs** supporting complete **CRUD** operations and optimized backend performance.
- Enhanced UI with **Bootstrap** and custom CSS; currently migrating to **Tailwind CSS** for better design scalability.
